

5. Git-HOL

Installing Git

```
KIIT@BT-22051573 MINGW64 ~
$ git --version
git version 2.50.1.windows.1
```

Configuring the username and user-email

```
KIIT@BT-22051573 MINGW64 ~
$ git config --list
diff.astextplain.textconv=astextplain
filter.lfs.clean=git-lfs clean -- %f
filter.lfs.smudge=git-lfs smudge -- %f
filter.lfs.process=git-lfs filter-process
filter.lfs.required=true
http.sslbackend=openssl
http.sslcainfo=C:/Program Files/Git/mingw64/etc/ssl/certs/ca-bundle.crt
core.autocrlf=true
core.fscache=true
core.symlinks=true
pull.rebase=false
credential.helper=manager
credential.https://dev.azure.com.usehttppath=true
init.defaultbranch=master
gui.recentrepo=C:/Users/KIIT/https<U+F03A>github.com/theforage/forage-jpmc-swe-task-1
user.name=AmritaKumari17
user.email=amritakumari170105@gmail.com
filter.lfs.clean=git-lfs clean -- %f
filter.lfs.smudge=git-lfs smudge -- %f
filter.lfs.process=git-lfs filter-process
filter.lfs.required=true
core.editor=notepad++
```

Navigating to the local repo

```
KIIT@BT-22051573 MINGW64 ~
$ cd GitBranchDemo
```

1. Verify if master is in clean state.

```
KIIT@BT-22051573 MINGW64 ~/GitBranchDemo (master)
$ git checkout master
git status
Already on 'master'
On branch master
nothing to commit, working tree clean
```

2. List out all the available branches.

```
KIIT@BT-22051573 MINGW64 ~/GitBranchDemo (master)
$ git branch
* master
```

3. Pull the remote git repository to the master

```
KIIT@BT-22051573 MINGW64 ~/GitBranchDemo (master)
$ git remote add origin https://gitlab.com/amritakumari170105-group/gitbranchdemo.git
```

4. Push the changes, which are pending from “Git-T03-HOL_002” to the remote repository.

```
KIIT@BT-22051573 MINGW64 ~/GitBranchDemo (master)
$ git push -u origin master

 * [new branch]      master -> master
branch 'master' set up to track 'origin/master'.
```

5. Observe if the changes are reflected in the remote repository.

The screenshot shows the GitLab web interface for a repository named 'GitBranchDemo'. The interface is in dark mode. On the left, there is a sidebar with navigation options: Project, Search, Pinned, Issues, Merge requests, Manage, Plan, and Code. The main content area shows the repository details. At the top, it says 'amritakumari170105-group / GitBranchDemo'. Below that, there is a green 'G' icon and the repository name 'GitBranchDemo' with a 'Free' badge. There are buttons for 'Find file' and 'Code'. A commit message 'Added branchfile.txt in GitNewBranch' by 'Amrita Kumari' is displayed, along with the commit hash '946ed5b5' and a 'History' button. Below this, a table lists the files in the repository:

Name	Last commit	Last update
branchfile.txt	Added branchfile.txt in G...	13 hours ago
masterfile.txt	Initial commit on master ...	13 hours ago

On the right side, there is a 'Project information' section showing: 2 Commits, 1 Branch, 0 Tags, and 626 B Project Storage. There are also links to 'Add README', 'Add LICENSE', 'Add CHANGELOG', and 'Add CONTRIBUTING'.
